**RE: Corrective Action Order CPF No. 5-2017-7002H
Granite Point Tank Farm Pipeline Facility
Item 5 - Approval of Restart Plan**

Dear Mr. Lalicker:

On April 7, 2017, the Pipeline and Hazardous Materials Safety Administration (PHMSA) issued a Corrective Action Order to Hilcorp Alaska, LLC (Hilcorp) for the potential hazards associated with the release from its pipeline on Hilcorp's Granite Point Tank Farm Pipeline Facility and proposed that Hilcorp to take certain corrective measures. One of the measures required Hilcorp to shut down the Anna to Bruce crude oil pipeline and not operate that pipeline until authorized by the Director of the Western Region.

Item 5 of the Corrective Action Order requires Hilcorp to submit a Restart Plan for approval to the Western Region Director (Director). Through the April 20, 2017 e-mail and April 24, 2017 revisions e-mail, Hilcorp officially submitted a letter and supporting documentation to PHMSA requesting approval to restart production on the Anna Platform. PHMSA has reviewed the submitted letter and supporting documentation. Based on this review the Director approves Hilcorp's Restart Plan as it relates to pipeline operations. This approval does not affect any other order, regulatory requirement, or condition required by state or federal agencies as it relates to platform operations that Hilcorp may be required to comply with prior to the continued operations of the Anna to Bruce crude oil pipeline.

If you have any questions concerning this letter, please contact Mr. David Hassell, Alaska Office Operations Supervisor, at (907) 271-6519.

Sincerely,

A handwritten signature in black ink, appearing to read "Chris Hoidal", written over a horizontal line.

for
Chris Hoidal

Director, Western Region

Pipeline and Hazardous Materials Safety Administration
